

DAN PIASSICK

Monte and Tamera Martin

MMD SERVICES

WHEN MONTE MARTIN BEGAN HIS DESIGN AND FINE ART SERVICES business 25 years ago, his niche was primarily art installations and lighting. Today, this is only part of what he and his wife, Tamera, offer at MMD Services, formerly Martin & Martin Design, a multifaceted professional firm specializing in everything from art hanging and storage to lighting and electrical to custom furniture design and fabrication. When Monte and Tamera married, they combined their backgrounds and passion for all things art, design, fashion, and architecture and rebranded the company to MMD Services. Their clients include museums, galleries, private collectors, custom homebuilders, luxury retailers, hotels, restaurants, designers, and architects who understand the importance of precise

execution when it comes to making spaces both functional and beautiful. "We do a lot of things," Monte says. "We're creative engineers and problem solvers. We're lighting designers, custom fabricators, fine art handlers, and electricians. Whatever the project is, we'll devise a creative and beautiful solution." Hammer, paint, build, repair, and refurbish MMD does that, too. The MMD Services team is also sought after for fine art and antiques storage, whether you have too much or you need it shipped. When it's ready for placement, they provide installation. "We are a one-stop shop," Tamera says. "We help make spaces beautiful and run smoothly. Often, we are hired for one service and wind up helping clients with everything else. They dream it, and we bring their vision to life."
